

0-0-25-17 is a clear, chloride-free solution with the highest potassium and sulfur content available on the market. This product allows both potassium and sulfur to be supplied in one highly soluble form. 0-0-25-17 boosts resistance to environmental stress and has proven to be a great addition to N and P starters.

Advantages

- Is a neutral to slightly basic solution with excellent cold weather stability
- Can be applied through all types of irrigation systems and will not plug drip lines
- Lowers blending time and cost
- Is easy to handle
- Fortifies liquid starter formulations and is compatible with ammonium polyphosphate (10-34-0 and 11-37-0) & UAN 28 and UAN 32

Applications

Application of 0-0-25-17 should be made based on soil, soil release rate test and/or plant tissue analysis for potassium. Starter Fertilizer: Apply 1 to 4 gallons of 0-0-25-17 per acre by itself or with other starter fertilizers in a 2" X 2" or a 2" X 0" placement (2 inches to the side of the seed. Foliar Fertilizer Application: Small Grains – Apply 2 to 4 quarts per acre at tillering to early boot stage. Alfalfa – Apply 4 to 6 quarts at crown green up or on regrowth after cutting. Soybeans – 4 to 6 quarts per acre at R1 to R2 stage. For recommendations regarding crops not listed contact your Pritchard Ag LLC representative.

CAUTION: KEEP OUT OF REACH OF CHILDREN. This product is harmful if swallowed. Avoid contact with eyes, open cuts, or sores. Keep from freezing. If this product is stored in cold or freezing weather it may separate or thicken; this will not harm the performance. If frozen or cold, warm the product to room temperature and stir thoroughly before using.
