

Micro pak is a combination of four elements: Boron, Copper, Manganese, and Zinc. This is essential to plant nutrition for the prevention and treatment of micronutrient deficiency. Micronutrients are necessary for normal plant growth and reproduction. Deficiencies in the soil of the different micronutrients, in combination or alone, may be found throughout the U.S. and the Canadian provinces. When sufficient amounts of the micronutrients are not available to plants and turf, both root and top growth is affected; chlorophyll formation is reduced, a general retardation of growth occurs, and even the function of the nitrogen-fixing bacteria is interrupted.

Guaranteed Analysis

Boron (B)	0.05%
Copper (Cu)	0.50%
Manganese (Mn)	2.00%
Zinc (Zn)	2.00%

Inert Ingredients

Hydrogen Hydroxide / Water	95.45%
Total	100%

Advantages

- Immediate leaf and root absorption
- Healthy, vigorous root and top growth
- More beautiful, luxuriant greening
- Compatible with various NPK products

Applications (lawns, football fields, parks): May be applied with a sprayer, proportioning device, or a sprinkling can.

- For 1,000 square feet, mix 16 ounces of concentrate with 5 gallons of water
- For 1 acre, mix 1 qt. to 1 gallon of concentrate with 15 to 20 gallons of water

Note: over the entire area, spray the mixed solution as evenly as possible. This product can be mixed with liquid fertilizers for a complete, one-step treatment; fertilizers will absorb quicker with this product.

CAUTION: KEEP OUT OF REACH OF CHILDREN. This product is harmful if swallowed. Avoid contact with eyes, open cuts, or sores. Keep from freezing. If this product is stored in cold or freezing weather it may separate or thicken; this will not harm the performance. If frozen or cold, warm the product to room temperature and stir thoroughly before using.
